

Investment Philosophy

Defend capital
Participate in rising markets
Outperform in bear markets

Portfolio Characteristics

The Objective: The Tactical Income portfolio is a global, unconstrained income portfolio. It seeks the best income opportunities in any economic and interest rate environment. It has a dividend yield goal of 1.5x it's benchmark's yield. As such, it has the potential to earn high income solely from earned dividends and interest while still providing prudent risk management.

Suitable for: May be suitable for an investor seeking a higher, distributable current income solely from earned dividends and interest.

Investment Process

"Macro" Fundamental Top-Down
"Micro" Quantitative Bottom-Up
"Quantamental" Asset Allocation

Portfolio Advantages

1. Global Diversification: Comprehensive asset class universe
2. Allocations Adjust: Move with economic changes
3. Flexible Allocations: Credit, duration, countries
4. Controlled Risk: No leverage, shorts, or derivatives
5. Ownership Transparency: Client owns and sees positions

Risk Management

1. Passive Indices: thousands of holdings reduce concentration risk
2. Tactical Overlay: manage economic risk

Dividend Yield

As of Date: 12/31/20

	Current Yield	Average 3-Year Yield	% of Benchmark Yield
TAG Tactical Income	6.17	5.53	2,468
ICE BofA ML 1-3 Year US Corp & Gov TR Index*	0.25	1.81	100

***The TAG Tactical Income strategy is materially different from the composition of the benchmark to which it's compared.**

Why Tactical?

A well-diversified global portfolio, enhanced by Tactical Asset Allocation, may offer investors more consistent, risk-adjusted returns.

Price and value often diverge, creating opportunity. Tactical Asset Allocation is a dynamic investment style that adjusts asset allocations to RPG's forward view of the relative risks and returns of various asset classes. This is distinguished from Strategic Asset Allocation, which is a mechanical, passive process of rebalancing portfolios back to their original allocations. The weakness of this approach can be its failure to allow for new information.

Disclosures

Compliance Statement: Tactical Allocation Group (TAG), a division of Risk Paradigm Group, LLC a/k/a RPg Asset Management, previously claimed compliance with the Global Investment Performance Standards (GIPS®) and was independently verified for the periods January 1, 2006 to December 31, 2015 by The Spaulding Group. The verification report is available upon request. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.

Firm Definition: TAG joined Risk Paradigm Group, LLC (RPG) and became a division of the firm on July 22, 2016. RPG is an investment adviser registered with the Securities and Exchange Commission under the Investment Advisers Act of 1940, as amended ("Advisers Act"). TAG uses active management to construct globally-allocated, diversified portfolios. TAG serves high net worth individuals, corporate, pension and profit sharing plans, charitable organizations and foundations, in both direct advisory relationships as well as sub-advisory relationships through independent financial advisors. TAG was founded as an independent business entity in 2004; the Chief Investment Officer left the firm in April 2015. The Firm includes only the assets under TAG's discretionary management which were invested in the Tactical Income, Tactical Conservative, Tactical Moderate, Tactical Growth, and Tactical Equity portfolios during the indicated time periods.

Composite Description: The Tactical Income portfolio is tactically allocated towards global fixed income. The portfolio is designed to have a long-term return objective similar to the ICE BofA ML 1-3 Year US Corporate & Government Bond TR Index. The portfolio utilizes Exchange-Traded Products to implement investment strategies.

Composite Fee: Net returns are calculated and displayed net-of-all-actual-fees. Gross returns are calculated and displayed net-of-all-actual-flows. Fees can be different from client-to-client, depending on the size of the client's account under TAG's management as well as the business relationship with TAG. TAG conducts business in separately managed accounts, or commonly called "wrap fee accounts". The separately managed account fee includes all charges for trading costs, advisory, portfolio management, custody and other administrative fees, including the independent financial advisor fee. Composite assets were 100% wrap fee for each year shown prior to July of 2016. Fees are billed quarterly in advance, based on the account asset value at the end of the quarter.

Composite Criteria: The composite creation date is January 2, 2012. The Tactical Income portfolio includes all fully discretionary fee paying accounts, taxable and tax-exempt separately managed accounts benchmarked to the ICE BofA ML 1-3 Year US Corporate & Government Bond TR Index. The composite minimum is \$25,000. If an account drops below \$25,000 from market movement, it will be removed from the composite. If flows in an account are greater than or equal to 10% of the beginning monthly account value, that account is removed from the composite for that month. Monthly composite returns, which are linked geometrically, are calculated by the asset weighted-average of the accounts. The composite returns include the reinvestment of dividends, interest received and realized capital gains and are expressed as a percent return in U.S. Dollars. The portfolio dispersion of returns is measured by the asset weighted standard deviation of the portfolio returns represented within the composite for the full period. For periods in which the composite contained five accounts or fewer, the dispersion is marked N/A. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.

Risk Disclosures and Additional Information: Your individual account performance will vary according to the date of your initial investment, the amount and timing of your contributions and withdrawals. Past performance is not an indication of future results. Investment return and principal value will fluctuate, so that your investment, if sold, may be worth more or less than the original cost. Investing in non-U.S. securities may entail higher risk due to non-U.S. currency fluctuations and political or economic uncertainty that may be especially heightened when investing in emerging markets. Diversification does not ensure against loss. All investments involve a risk of loss.
